

5	Force Analysis	26
5.1	Newton's Law of Universal Gravitation	26
5.2	Mass and Weight	27
5.3	The Gravitational Field	28
5.4	Forces from Surfaces	28
5.5	Analyzing Forces using Vectors	30
6	One-Dimensional Motion	32
6.1	Kinematic Equations	32
6.2	Accelerated Horizontal Motion	33
6.3	Free-fall: Accelerated Vertical Motion	34
7	Motion in Two Dimensions	36
7.1	Projectile Motion	36
7.2	Horizontally Launched Projectiles	36
7.3	Circular Motion	40
8	Conservation in Mechanical Systems	41
8.1	Gravitational and Elastic Potential Energy	41
8.2	Conservation of Mechanical Energy	43
8.3	Conservation of Momentum	44
9	Oscillatory Motion	49
9.1	Oscillating Motion	49
9.2	Amplitude, Frequency, and Period in Simple Harmonic Motion (SHM)	49
10	Mechanical Waves	51
11	Conservation of Charge	52
12	Electromagnetic Induction	53
13	Electromagnetic Waves	54
14	Quantum Physics	55
	Multiple Representations in the Physics Classroom	56
	Equation Sheet	59
	Glossary	60
